

SaskPower & SaskEnergy: new incentive for home energy efficiency

SaskPower and SaskEnergy have partnered to develop the Home Efficiency Retrofit Rebate (HERR). This opportunity allows eligible homeowners in Saskatchewan to enhance their homes with high-performance window, doors insulation and air sealing retrofits.

These upgrades not only lower your energy usage and costs, but they also increase the overall comfort of your home.

To be eligible for the rebate, homeowners must first apply to Natural Resources Canada's (NRCan), Canada Greener Homes Grant (CGHG). The [Canada Greener Home Grant](#) offers grants from \$125 to \$5,000 to received a portion of your costs for eligible home retrofits. It also provide up to \$600 contribution towards the total cost of your -pre- and post-retrofit EnerGuide evaluation.

The New SaskPower/SaskEnergy Program HERRS program offers a maximum rebate of up to \$1,800 and an additional \$200 is available to subsidize the cost of the pre- and post-upgrade EnerGuide evaluations.

This bumps the total eligible incentive up to \$6,800 and \$800 of the EnerGuide evaluation.
